

## **THE FIRST TOOTH FAIRY**

'Long ago and far away, fairies lived in every nook and cranny throughout the land. As naturally shy creatures they kept themselves hidden, doing their work quietly, silently.

Now, just as then, fairies help to make our planet a shinier and more beautiful place. Fairies sprinkle their magic dust wherever they go and whatever they are doing.'

There are so many different Fairy Clans; Meadow Fairies; Woodland Fairies; Earth Fairies; Fairies of the Coast; Tree Fairies and Fairies in the Fields to name but a few. However in these days there were no tooth fairies. Until one day when Fata set off to find her perfect fairy work. With the help of Seagull, she met Poppy and her mummy and everything changed.
